### **DETAILED ACTION**

1. This is in response to the amendment filed on 11 December 2008.
2. Claims 23-49 are pending in the application.
3. Claims 23-36 and 38-48 have been rejected.
4. Claims 37 and 49 have been allowed.
5. Claims 1-22 have been cancelled.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 23-36 and 38-48 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 23-36 and 38-48 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 22-36 and 38-48 are rejected under 35 U.S.C. 101 based on Supreme Court precedent and recent Federal Circuit decisions, a 35 U.S.C § 101 process must (1) be tied to a particular machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. In re Bilski et al, 88 USPQ 2d 1385 CAFC (2008); Diamond v. Diehr, 450 U.S. 175, 184 (1981); Parker v. Flook, 437 U.S. 584, 588 n.9 (1978); Gottschalk v. Benson, 409 U.S. 63, 70 (1972); Cochrane v. Deener, 94 U.S. 780,787-88 (1876).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim

Art Unit: 2431

should positively recite the particular machine to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Independent claims 23 and 38 are directed towards a method of scrambling a data stream and a descrambling method, respectively. Here, applicant's method steps are not tied to a particular machine and do not perform a transformation. Thus, the claims are non-statutory. Any claims not directly addressed are rejected on the virtue of their dependency.

The mere recitation of the machine in the preamble with an absence of a machine in the body of the claim fails to make the claim statutory under 35 USC 101. *Note the Board of Patent Appeals Informative Opinion Ex parte Langemyer et al.*

#### ***Allowable Subject Matter***

8. Claims 23-49 are allowed over prior art.

As to independent claims 23 and 37, prior art does not disclose, teach or fairly suggest encoding a plurality of video frames to generate a compressed bitstream. Prior art does not disclose, teach or fairly suggest generating a stream of transport packets to transport the compressed bitstream. Prior art does not disclose, teach or fairly suggest that each transport packet has a fixed length and comprises (i) a header and (ii) a payload having data from the compressed bitstream. Prior art does not disclose, teach or fairly suggest selecting every n-th transport packet in the stream of transport packets for scrambling processing, where n is a positive integer. Prior art does not disclose, teach or fairly suggest that in each selected transport packet, scrambling a first portion of the payload while leaving at least a second portion of the payload unscrambled.

Art Unit: 2431

As to independent claims 38 and 49, prior art does not disclose, teach or fairly suggest receiving a stream of transport packets that transports a compressed bitstream. Prior art does not disclose, teach or fairly suggest that each transport packet has a fixed length and comprises (i) a header and (ii) a payload having data from the compressed bitstream. Prior art does not disclose, teach or fairly suggest the compressed bitstream encodes a plurality of video frames. Prior art does not disclose, teach or fairly suggest selecting every  $n$ -th transport packet in the stream of transport packets for descrambling processing, where  $n$  is a positive integer. Prior art does not disclose, teach or fairly suggest that in each selected transport packet, descrambling a first portion of the payload while not subjecting at least a second portion of the payload to descrambling. Prior art does not disclose, teach or fairly suggest reconstructing the compressed bitstream using the descrambled first portions of the selected transport packets.

Any claims not directly addressed are allowed on the virtue of their dependency.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
